Program Benefits

Implementation of a tabbing program using Harbor Bosun‘ water marking products will benefit the entire marina population. Knowing raw sewage discharges are aggressively deterred will comfort swimmers. The local economy will benefit by attracting more recreational activity. Enforcement agencies will be better equipped to identify violators of the Clean Water Act and other similar ordinances. Responsible boaters are clearly distinguished from violating boat operators. Local pollution control agents will be able to concentrate on determining and correcting other sources of pollution. , fluorescent yellow/green color.
